5. STRATEGY

6. FAQ

How does BNB KING work?

You deposit your BNB and every day you will earn 12% on your invested amount that accrues rewards throughout the day. Please note, that your ROI will decrease with each subsequent claim. To keep the highest ROI of 12% per day and higher, we encourage you to compound your rewards for six days and claim on the seventh day. This mechanism is built into the contract.

What are "Crowns"?

Crowns are the miners that are hired with BNB and work to get your rewards. This is just a term we decided to use.

What is the price of Crowns?

Crowns do not have a set price.

Higher TVL more Crowns per BNB, Lower TVL less Crowns.

This creates level playing field so no user can be late.

How long will the contract pay out rewards?

As long as there is balance in the contract, there will always be rewards.

What is the minimum deposit?

0.01 bnb minimum deposit requirements.

What prevents the developers from rugging?

The contract is immutable, meaning that once it is deployed the developers have no access to the contract and cannot send anything out of the wallet. The contract is immutable and fully audited by AuditComp. It is audited and verified. You can view this on bscscan.com and the audit it is found on the website.

Can I be too late to deposit my funds?

No, the contract is written to incentivize anyone. However, the impact is just very small. If you can get in early, you should consider doing it and start compounding your stake.

Can I get my initial back?

BNB KING is a locked rewards pool, so no. You get your initial back over time.

What is the best strategy?

We recommend the tried and tested method. Re-invest 6 days and take profits 1 day a week. It is written in the contract.

What is the minimum deposit?
